AK 578
DIAGONAL WEATHERING BRUSH

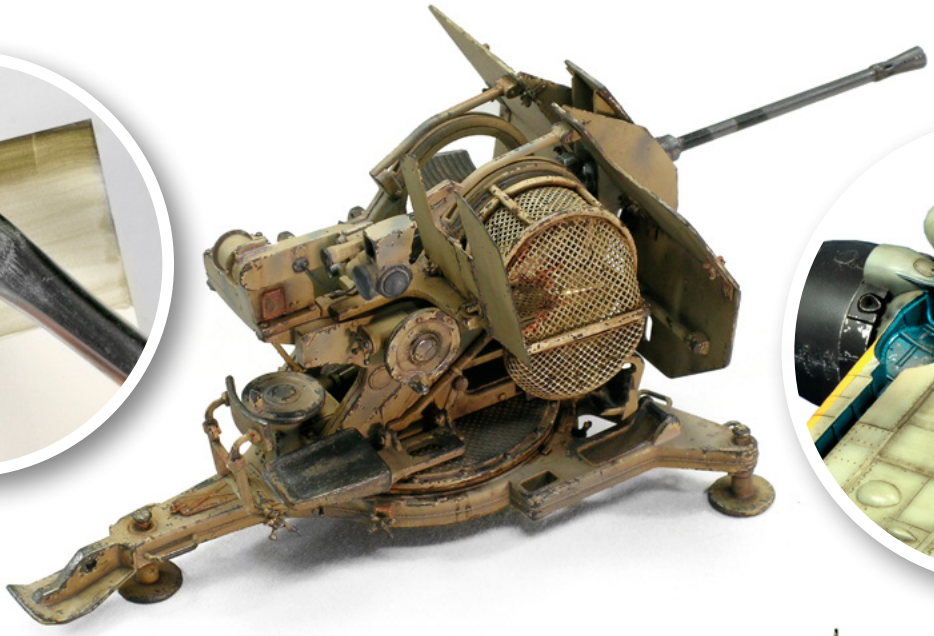
This brush has been designed for the weathering processes and to work comfortably with very good control, thanks to its contact angle over the surface.

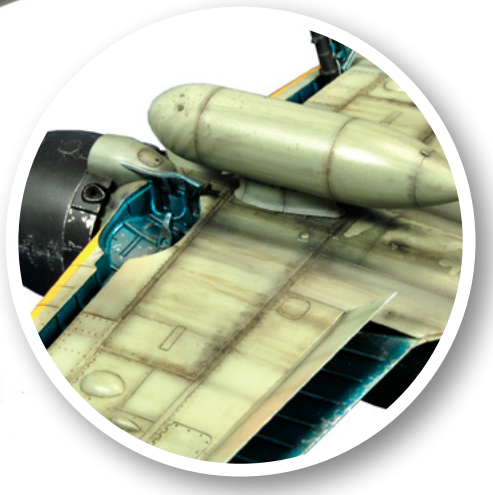
Select the area where to apply the product.

Paint some vertical strokes which we will soften subsequently.

With the help of tis special diagonal tip it is very easy to work these kind of effects.

The result will always depend on the weathering level we want to achieve.





Thanks to its special tip it can reach any angle, for example to work fresh pigments.
