AK 014
WINTER STREAKING GRIME

Enamel product to create realistic streaking effects on our white-washed winter vehicles. Easy to apply. Very realistic color.

To create dirt streaks, use the product directly from the bottle and and draw fine lines with a brush.

Use a clean brush dampened with AK011 White Spirit and blend in the streaks working from top to bottom.

In this case we do an accumulation of dirt on a corner applying the product directly from the jar to the desired area.

We can darken edges and corners.

Blend in the Winter Streaking Grime for a natural effect.
