AK 263
WASH FOR WOOD

This product is specially developed to be applied over parts painted in brown shades that simulate the different kinds of wood.

Applied with a fine brush washing around the nooks and crevices.

After a few minutes, and once dry, remove the excess with a clean brush and AK011 White Spirit.

It is convenient to clean the brush as we remove the wash excess.

We can use it either to darken a specific area...

...or highlight the lines of separation between the planks.

In this case, to remove the excess and extend well, is more convenient to use a flat brush.

Darken the bottom of the planks...

...and shade it with the brush and the thinner.

Application to other wood tones.
